PICTURE THIS: A 747 FLYING AT 500 FT. DISPENSING 20,000 GALLONS OF WATER World's Largest and Fastest Firefighting Aircraft Demonstration

WHAT: Demonstration and media tour of the Evergreen B747 Supertanker, the world's largest and fastest firefighting aircraft. The Supertanker will release 20,000 gallons of water at 500 feet onto the McClellan Airport as fire season approaches.

WHERE: McClellan Airport - McClellan Jet Services, 3028 Peacekeeper Way,
McClellan, CA 95652

WHEN: Thursday, June 11th 11:00 AM, PST on Site Contact: Chris Rosica 201-981-0533

On June 11, Evergreen International Aviation will present and demonstrate its cutting edge B747 Supertanker that will forever change the way wildfires are fought at a special news conference and media tour. The Supertanker is the largest tanker aircraft available today and has the same capability of any long-range Boeing 747 passenger aircraft. The aircraft is capable of dispersing a variety of products in response to oil spills, soil stabilization, biological/chemical poisoning and radiation.

With a **payload of more than 20,000 gallons and a response time of 600 mph**, it has more than **eight** times the drop capability and twice the speed of other federal air tankers currently fighting fires. The large capacity of the patented pressurized system is uniquely designed to attack urban interface wildland fires and fight multiple fires in one flight. The Evergreen Supertanker drops at higher altitudes, creating a significant **safety** buffer. This enables the aircraft to fight fires- **at night** when wildfires are more vulnerable to firefighting tactics. With a drop pattern of three miles in length and a football field wide, the Supertanker will provide a predictable result to minimize costs and collateral damage. For additional information visit www.evergreenaviation.com or contact Chris Rosica 201-981-0533.

For Immediate Release – June 9, 2009

About McClellan Airport:

McClellan Airport is the most successful base conversion in the US and is home of the largest Fixed Base Operator (FBO) in the greater Sacramento region, one of the largest in Northern California. MJS is responsible for the aviation property management, leasing and marketing at McClellan and plays an integral role in the development of the airport. This fully-operational airport has become the Gateway to Business and General Aviation for the Sacramento region. McClellan Airport features a 10,700 ft runway, full IFR instrument approach and has the only 24/7/365 FBO in the Sacramento Valley with more than 1.5 million SF of aviation property.

The County of Sacramento selected McClellan Business Park, LLC, in 1999 to acquire and redevelop McClellan Air Force Base. McClellan Air Force Base was renamed McClellan Business Park (McClellan Park) in 2001. McClellan Park boasts a fully-operational airport, full-service hotel, fitness facility, rail system, office, industrial, retail and dormitories. The project consists of 3,000 acres with approximately 8.5 million square feet of useable buildings and 500 acres of developable land and is fully entitled for over 16 million square feet of commercial, retail, office and residential buildings. For additional information, please visit McClellan Business Park's website at <http://www.mcclellanpark.com>.
